Investments involve risks. Funds are investment products and some may involve derivatives. The value of investments, units/shares of the funds and the income accruing to the units/shares, if any, may fall or rise, and the investor may not get back the original sum invested. Past performance is not necessarily indicative of future performance. In a worst-case scenario, the value of the fund may be worth substantially less than the original amount you have invested (and in an extreme case could be worth nothing). Investments in funds are not deposits or other obligations of or guaranteed by HSBC or any of its affiliates. Foreign currency transactions are subject to risk of exchange rate fluctuations and exchange controls may apply to certain currencies from time to time. To find out more about the risks relating to investment funds, please go to [hsbc.com.sg/wealth/investments/products/unit-trusts](https://www.hsbc.com.sg/wealth/investments/products/unit-trusts).

Investors and potential investors should read the prospectus, product highlights sheet, information memorandum or profile statement before deciding whether to subscribe for, or purchase units/ shares of the fund.

Buying a life insurance policy is a long-term commitment. An early termination of the policy usually incurs high costs, and the surrender value payable may be less than the total premiums paid.

As a result, you may receive less than the original Time Deposit placement amount.
